Operations Review
by Allen W. Dulles

THE MJ-12 PROJECT

The Overview. In pursuant to the Presidential National Security Memorandum of June 28, 1961, the U.S. intelligence operations against the Soviet Union are currently active in two broad areas; aircraft launch vehicles incorporating ELINT and SIGINT capabilities; and balloon borne decoys with ECM equipment.

The Situation. The overall effectiveness about the actual Soviet response and alert status is not documented to the point where U.S. intelligence can provide a true picture of how Soviet air defenses perceive unidentified flying objects.

Informational sources have provided some detail on coded transmissions and tactical plans whose reliability is uncertain, and thus, do not give us precise knowledge of Soviet Order of Battle. Current estimates place Soviet air and rocket defenses on a maximum alert footing with air operations centered on radar and visual verification much the same as ours.

Future psychological warfare plans are in the making for more sophisticated vehicles whose characteristics come very close to phenomena collected by Air Force and NSA elements authorized for operations in this area of intelligence.

Basis for Action. Earlier studies indicated that Americans perceived U.F.O. sightings as the work of Soviet propaganda designed to convince U.S. intelligence of their technical superiority and to spread distrust of the government. CIA conducted three reviews of the situation utilizing all available information and concluded that 80% of the sighting reports investigated by the Air Force's Project Blue Book were explainable and posed no immediate threat to national security. The remaining cases have been classified for security reasons and are under review. While the possibility remains that true U.F.O. cases are of non-terrestrial origin, U.S. intelligence is of the opinion that they do not constitute a physical threat to national defense. For reasons of security, I cannot divulge pertinent data on some of the more sensitive aspects of MJ-12 activities which have been deemed properly classified under the 1954 Atomic Energy Act of 1954.

I hope this clarifies the necessity to keep current operations within CIA activities in sensitive areas from becoming official disclosure. From time to time, updates will be provided through NIE as more information becomes available.

(Signed) Allen W. Dulles
