MAIN SPENDING CATEGORIES

# Funding the intelligence program

The CIA, NSA and National Reconnaissance Office (NRO) receive more than 68 percent of the black budget. The National Geospatial-Intelligence Program's (NGP) budget has grown over 100 percent since 2004.

## The top five agencies, by spending

**National Reconnaissance Office**

Design, build, and operate the nation's signals and imagery

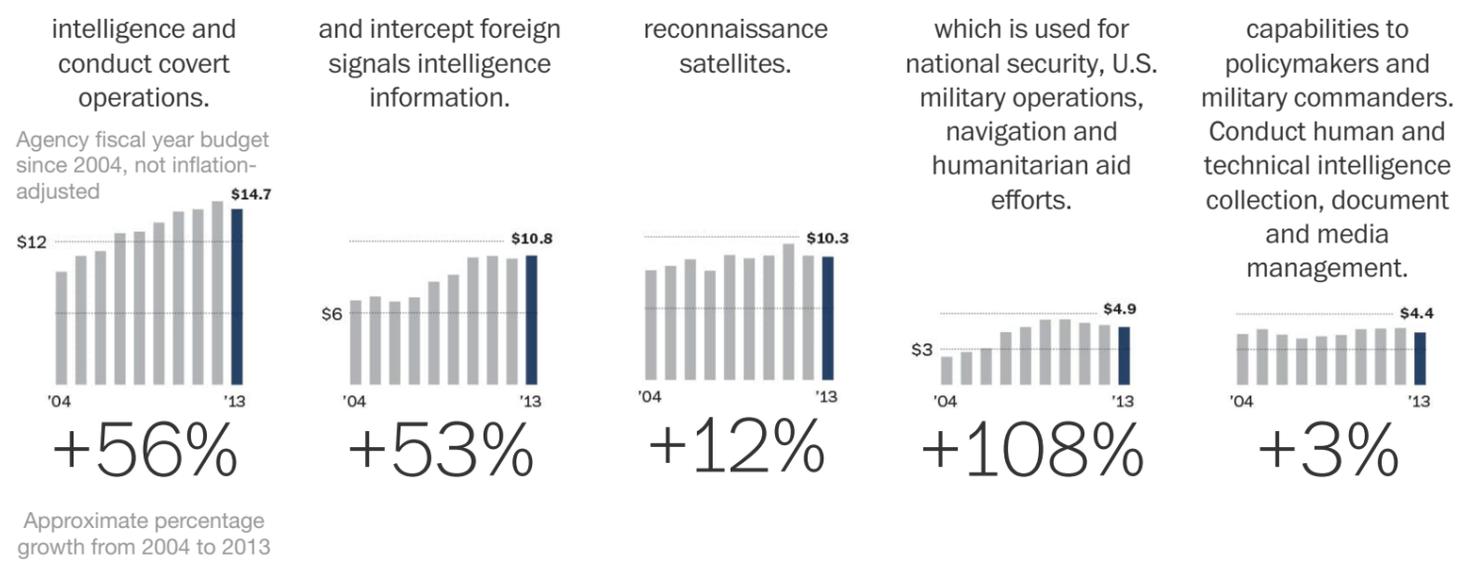

**National Geospatial-Intelligence Program**

Generate and provide imagery and map-based intelligence,

**General Defense Intelligence Program**

Provide assessments of foreign military intentions and

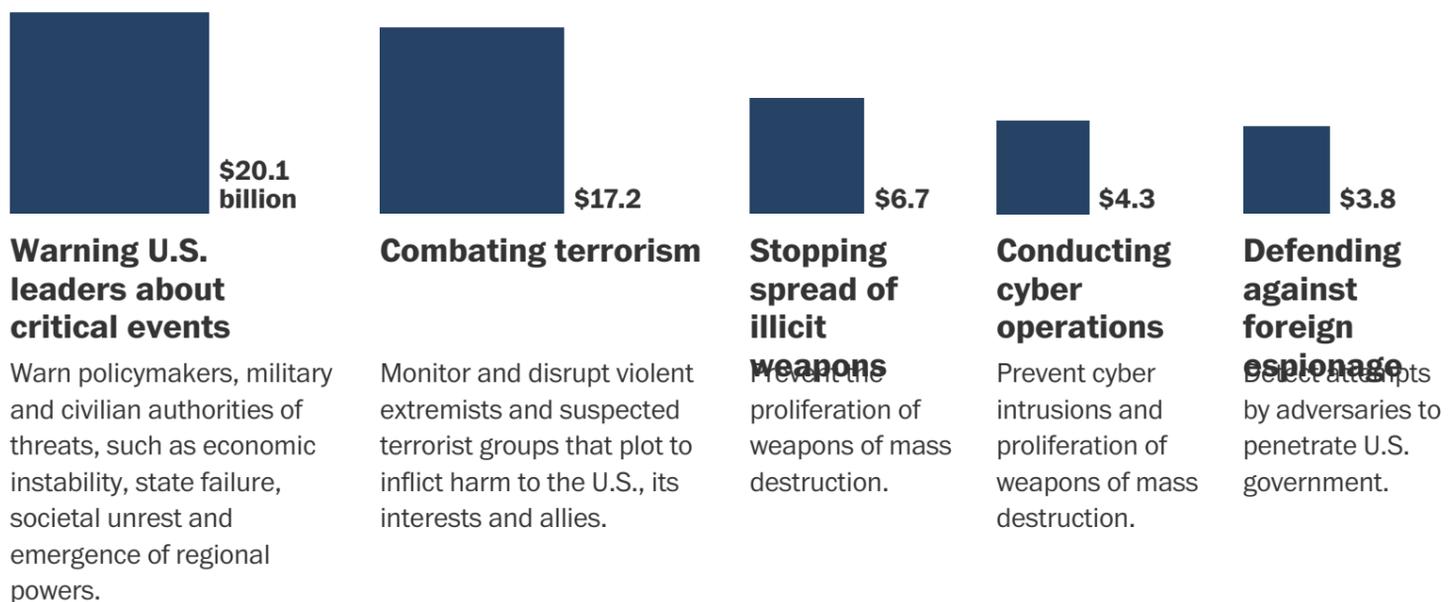

## Four main spending categories

Top secret spending can be divided into four main categories: data collection, data analysis, management, facilities and support and data processing and exploitation. The CIA and NRO are heavy on data collection while the NSA and NGP focus on data processing and exploitation as well as auxiliary functions like management, facilities and support.

## Funding five mission objectives

## Thirty-two types of expenses

Each agency has a unique breakdown of expenses that reflect the priorities of its mission. There is no specific entry for the CIA's fleet of armed drones in the budget summary, but a broad line item hints at the dimensions of the agency's expanded paramilitary role, providing more than

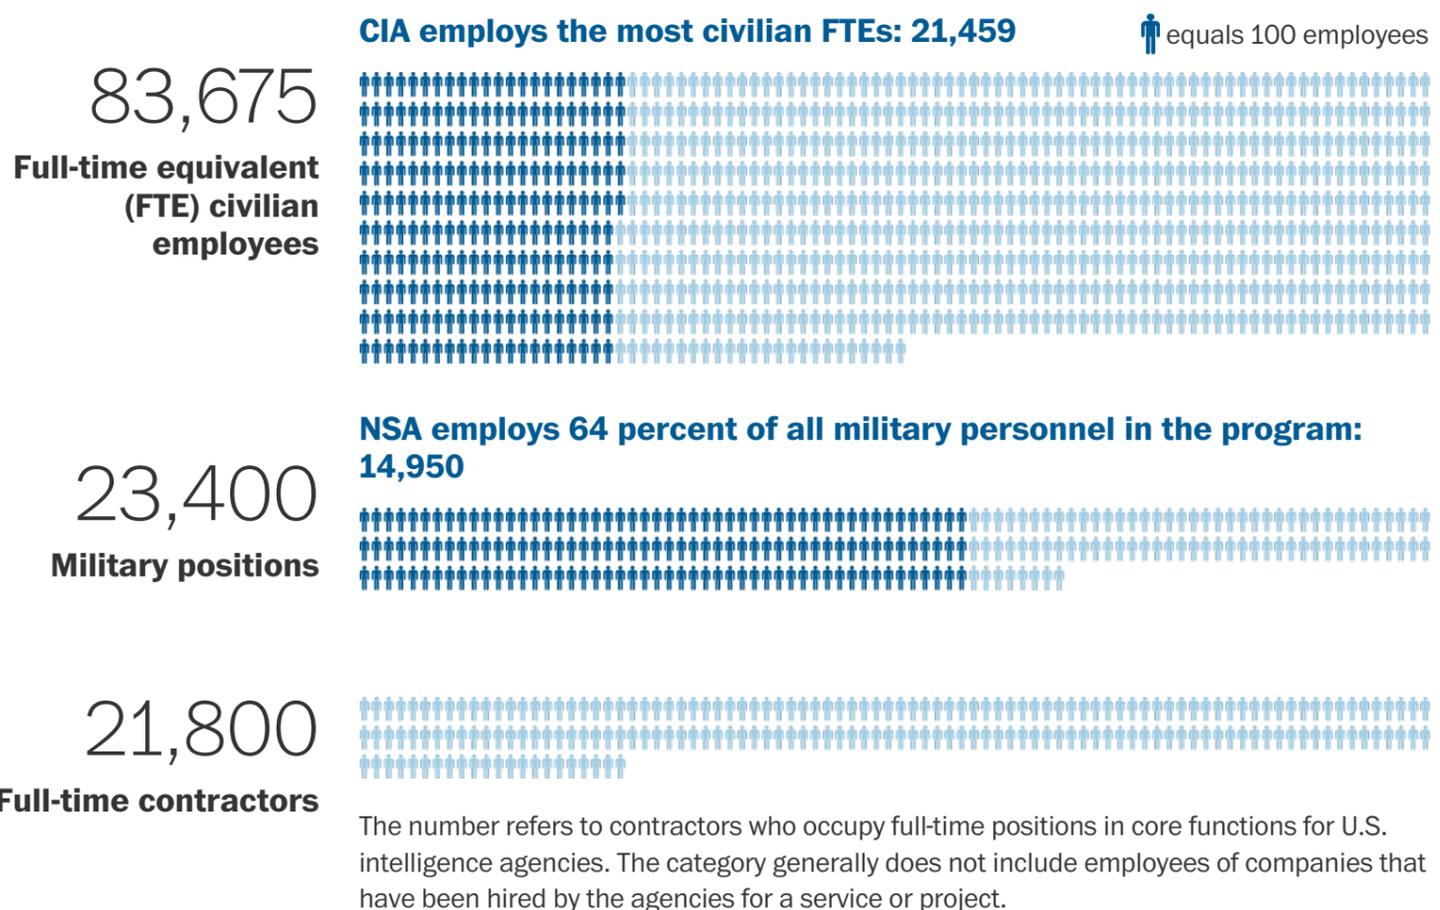

\$2.5 billion for “covert action programs” that would include drone operations in Pakistan and Yemen, payments to militias in Afghanistan and Africa, and attempts to sabotage Iran’s nuclear program.
